Reviewed by: Colin Steward 1/6/24

Hazard	Who Might Be Harmed	Is the Risk Adequately Controlled, or is More Needed	Review and Revision
Trips and falls over cables		Cables to be tied up and neatly placed. Any loose cables to be covered up/duct taped down.	
Lifting equipment and set up of equipment - potential damge to back and muscles, and splinters from handling timber.	Setting up staff and contractors	Ensure adequate staff are available to lift heavy items. Concerned staff will be advised to keep a straight back and bend their knees when lifting. Protective gloves should be worn when lifting timber or other rough items. Electrical equipment should be handled by sound engineers only. Persons experiencing symptoms caused by lifting equipment will be escorted to first aid/ first aid will be summoned if necessary.	
Electrical equipment installation		All electrical equipment and cabling should be checked by a competent person before installation. All electrical connections should be made by a competent person. Ensure that all circuits are isolated before connections are made. All electrical equipment and cabling will be sufficiently visible and isolated from customers. The tent will be managed by a volunteer at all times, ensuring that	
Hazardous mischief - e.g. climbing/falling; abduction; third party violence; bullying.		young people are safe, equipment is not damaged and made dangerous.
