

Wild Science

Wild Science Risk Assessment

Wild Science takes Health & Safety issues extremely seriously. All of our animals are hand-reared and are handled on a daily basis. We regularly inspect and assess our animals

All of our animals are kept as pets and we treat their welfare with passion. Animals are never taken out if they are unwell or in unsafe conditions/circumstances.

In the interest of hygiene, animal enclosures are cleaned regularly and a strict hand-washing regime is established at both the beginning and the end of every session.

Giant Millipede	
Risk	Prevention/Action
Biting/Stinging	No Risk. No Prevention/Action Required
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Snake	
Risk	Prevention/Action
Biting/Stinging	All snakes are of a docile breed and hand-reared so they are reluctant to bite. All snakes are medium sized and non-venomous. A bite would be small and unlikely to break the skin. If biting occurs, the Expert will secure all animals whilst seeking medical attention.
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Giant Cockroach	
Risk	Prevention/Action
Biting/Stinging	No Risk. No Prevention/Action Required
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Giant Stick Insect	
Risk	Prevention/Action
Biting/Stinging	No Risk. No Prevention/Action Required
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Tarantula	
Risk	Prevention/Action
Biting/Stinging	All Tarantulas are of a docile breed and hand-reared so they are reluctant to bite. All Tarantulas used are not highly venomous. A bite would be less than a Bee/wasp sting. If biting occurs, the Expert will secure all animals before seeking medical attention.
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Scorpion	
Risk	Prevention/Action
Biting/Stinging of Expert	To be kept in enclosure. Wild Science Expert only to handle Scorpion. Only Emperor Scorpions are used and their sting is similar to a bee/wasp. If the Expert is stung, the Expert will secure all animals before seeking medical attention.
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Rat	
Risk	Prevention/Action
Biting/Stinging	All Rats are hand-reared so they are reluctant to bite. If biting occurs, the Expert will secure all animals whilst seeking medical attention.
Escape	Is kept in secure enclosure. Qualified Expert to handle and supervise at all times. If escape occurs Expert will recover animal.

Rabbit	
Risk	Prevention/Action
Biting/Stinging	All Rabbits are hand-reared so they are reluctant to bite. If biting occurs, the Expert will secure all animals whilst seeking medical attention.
